

André Czupala

UX & Product Designer

Kurzprofil

I craft user-centered products with analytical thinking, high attention to quality, and a clear understanding of system coherence. By combining research, iterative prototyping, and the development of scalable design systems, I turn complex applications into clear, consistent, and intuitive experiences. I see challenges as opportunities for growth and never give up until I find a solution, learning new methods and tools when needed to deliver sustainable results.

Key Achievements

- Developed a multi-brand design system at Interone, enabling consistent scalability across products.
- Created the GoTiger app prototype, serving as the foundation for implementation and investor presentations.
- Winner of the UXy Award (1st place) at THI Ingolstadt.

Contact

- Ingolstadt, Germany
- +49 172 9083052
- hello@andreux.design
- andreux.design

Languages

- German (native)
- English (fluent)

Methods & Frameworks

User Research, Usability Testing, Lean UX, Atomic Design, Information Architecture, MVP, Design System Development and Standardization

Tools

- Figma
- Adobe CC
- Affinity Suite
- Sketch
- Notion
- Jira
- Confluence
- Unity

Technical Understanding

Basic frontend knowledge (HTML, CSS, JS, Bootstrap), CMS, JSON, component logic (Figma variants and states)

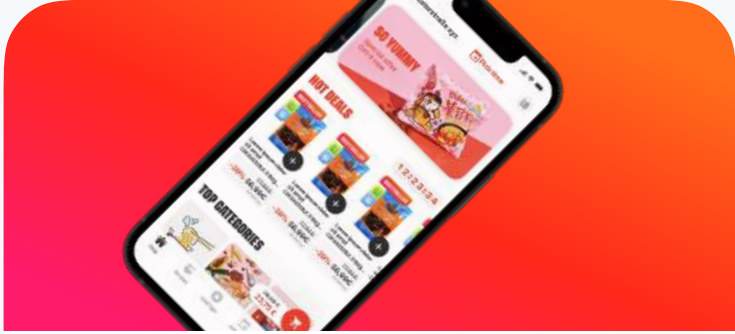

Approach & Work Ethic

- Make research-based decisions.
- Standardize components consistently.
- Document only what is essential.
- Deliver end-to-end and ensure a clean handoff.
- Work persistently, analytically, and with a strong commitment to quality.

Industries & Clients

Automotive (VW, Audi, Porsche, BMW), FinTech, E-Commerce, Public Sector, Enterprise Reporting and Process Digitalization, and AR/3D

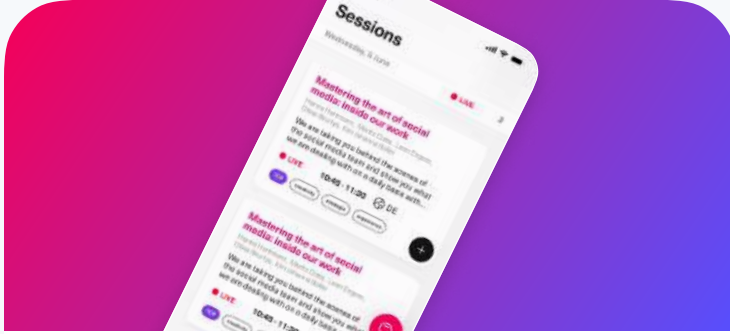

Selected Projects

GoTiger App

E-commerce app combining recipes, community features, and gamification elements.

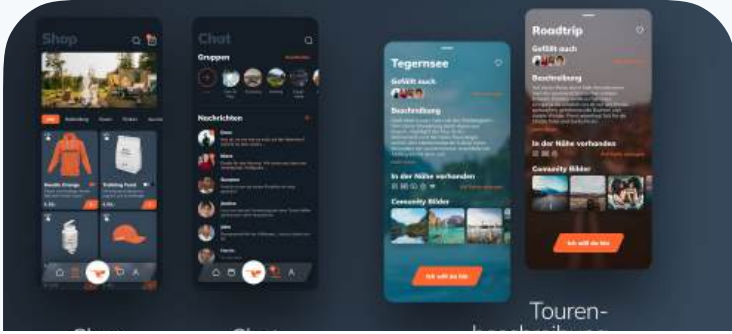

[View portfolio](#)

one-Conference App

for speakers and attendees, providing quick on-site navigation and orientation.

[View portfolio](#)

Colibre Outdoor-App

featuring maps, points of interest, routes, community interaction, and integrated shop functionality.

Relevant Professional Experience

October 2018 to September 2025 B.Sc. User Experience Design (see Education)

UX Design

UX structure and design systems for scalable platforms (Volkswagen, Federal Ministry).

February 2024 to December 2024

Interone GmbH Munich (hybrid)

- Developed a structured platform architecture for VW and the Ministry, resulting in clear navigation and reduced usability barriers.
- Unified and extended design systems to enable a consistent multi-brand experience and a more efficient developer handoff.
- Created interactive prototypes and validated them with QA to support evidence-based decisions and achieve measurable product quality improvements.

UX Design

End-to-end UX concept from research to prototype with focus on engagement and implementation.

April 2022 to May 2023

GoTiger GmbH Berlin (remote)

- Analyzed user needs through surveys and interviews, resulting in a clear app structure and prioritized features.
- Developed an interactive Figma prototype with a scalable design system, ensuring a seamless handoff to developers and supporting investor presentations.
- Validated user flows through usability testing, reducing friction during onboarding and increasing overall user acceptance.

UX & Visual Design

UX foundation and scalable UI system for a sustainable fintech platform.

August 2021 to April 2022

econos GmbH Munich (hybrid)

- Redesigned core areas of the investment platform, reducing complexity and improving conversion flows.
- Developed a component-based UI system with variants and states, accelerating development and ensuring a consistent user experience.
- Unified visual brand assets, strengthening recognition and building user trust.

Brand Design (Freelance)

Visual identity and cross-channel design for a sustainable premium seafood brand.

June 2020 to July 2021

SaferSalmon GmbH Groß-Gerau (remote)

- Developed a complete visual brand world, achieving clear differentiation and a high-quality product perception.
- Designed packaging and cross-channel marketing materials, ensuring a consistent presence online and offline.
- Managed print preparation and material selection, ensuring reliable production and a sustainable brand impact.

UX Design

Process digitalization and dashboards.

October 2019 to March 2020

ASAP Holding GmbH Gaimersheim (hybrid)

- Digitized internal business processes such as dunning management and vehicle booking, improving efficiency and reducing error rates.
- Developed management and departmental dashboards, enhancing transparency and enabling faster decision-making.

UX Design

Prototyping and information architecture.

April 2019 to June 2019

asioso GmbH Munich (hybrid)

- Designed prototypes and wireframes for internal tools (including LMU and ThyssenKrupp), resulting in a clearer information architecture and improved user orientation.

March 2016 to September 2018 B.Eng. Industrial Engineering (see Education)

Communication Service

Technical visualization and reporting in the automotive sector (Audi AG).

November 2012 to January 2016

ASAP Engineering GmbH Gaimersheim (on-site)

- Designed an Excel-based tool for CO₂ reports with automated PowerPoint export, enabling faster reporting creation and consistent data visualization.
- Created management presentations and trade fair media assets, improving decision-making precision and strengthening external communication impact.

Interactive Media & Project Management

AR interfaces and digital catalog systems.

July 2011 to October 2012

VisioEmotion GmbH Markgröningen (on-site)

now VIRTUALEMOTION

- Managed projects and quality assurance for AR and web applications, ensuring stable delivery and innovative user experiences.
- Designed and implemented interface components, providing seamless solutions from code to visual design.

Media Production

October 2010 to June 2011

Ull Würth Photo Studio & Meyle+Müller (on-site)

- Gained practical experience in photography and media production, forming the foundation for a later career in UX and design.

Education

User Experience Design (B.Sc.)

User research, prototyping, and systems thinking in digital product contexts.

October 2018 to April 2025

Technische Hochschule Ingolstadt

[see thesis \(German only\)](#)

- Bachelor's Thesis (Grade 1.7):** Development and evaluation of Filo – a platform for information consolidation, based on a mixed-methods study and a validated Figma prototype.
- Electives:** Lean UX (Grade 1.0), Brand Design, Service Design – advanced application of user-centered design methods.
- Winner of the UXy Award 2018 (1st place) and leader of multiple team projects – proven UX leadership and implementation competence.
- Additional coursework in Machine Learning and Cyber Security – strengthening technical understanding and interdisciplinary UX perspective.

Engineering and Management (B.Eng.)

Foundation studies focused on business administration and engineering before switching to UX Design.

March 2016 to September 2018

Technische Hochschule Ingolstadt

Photo and Media Technology (State-certified Technical Assistant + University Entrance Qualification)

Design-oriented media education with a focus on imaging, technology, and digital production.

September 2008 to July 2010

Kolping Educational Institute Heilbronn

- Provided a solid technical foundation in image editing, printing, and digital media.
- Formed the practical basis for a later career in design and user experience.
